African Culture Mike Ashley 1985 Africa, according to the contributors to this anthology, is one cultural river with numerous tributaries articulated by their specific responses to history and the environment. They concentrate on the similarities in behavior, perceptions, and technologies of African culture that tie those tributaries together. The fourteen original essays by leading scholars of African studies are organized in four general divisions which consider the ethno-cultural motif, the artistic tradition, concepts of cultural value, and cultural continua.

From Grain to Pixel Giovanna Fossati 2019-01-16 In From Grain to Pixel, Giovanna Fossati analyzes the transition from analog to digital film and its profound effects on filmmaking and film archiving. Reflecting on the theoretical conceptualization of the medium itself, Fossati poses significant questions about the status of physical film and the practice of its archival preservation, restoration, and presentation. From Grain to Pixel attempts to bridge the fields of film archiving and academic research by addressing the discourse on film's ontology and analyzing how different interpretations of what film is affect the role and practices of film archives. By proposing a novel theorization of film archival practice, Fossati aims to stimulate a renewed dialogue between film scholars and film archivists. Almost a decade after its first publication, this revised edition covers the latest developments in the field. Besides a new general introduction, a new conclusion, and extensive updates to each chapter, a novel theoretical framework and an additional case study have been included.
