2013-05-14 NATIONAL BESTSELLER • From the award-winning author of *We Should All Be Feminists* and *Half of a Yellow Sun*—the story of two Nigerians making their way in the U.S. and the UK, raising universal questions of race, belonging, the overseas experience for the African diaspora, and the search for identity and a home. Ifemelu and Obinze are young and in love when they depart military-ruled Nigeria for the West. Beautiful, self-assured Ifemelu heads for America, where despite her academic success, she is forced to grapple with what it means to be black for the first time. Quiet, thoughtful Obinze had hoped to join her, but with post-9/11 America closed to him, he instead plunges into a dangerous, undocumented life in London. Fifteen years later, they reunite in a newly democratic Nigeria, and reignite their passion—for each other and for their homeland.

Write for Your Life Anna Quindlen 2022-04-12

In this clarion call to pick up a pen and find yourself from “one of our most astute chroniclers of modern life” (The New York Times Book Review), #1 New York Times bestselling author Anna Quindlen shows us how anyone can write, and why everyone should. What really matters in life? What truly lasts in our hearts and minds? Where can we find community, history, humanity? In this lyrical new book, the answer is clear: through writing. This is a book for what Quindlen calls “civilians,” those who want to use the written word to become more human, more themselves. *Write for Your Life* argues that there has never been a more important time to stop and record what we are thinking and feeling. Using examples from past, present, and future—from Anne Frank to Toni Morrison, from love letters written after World War II to journal reflections from nurses and doctors today—*Write for Your Life* vividly illuminates the ways in which writing connects us to ourselves and to those we cherish. Drawing on her personal experiences not just as a writer but as a mother and daughter, Quindlen makes the case that recording our daily lives in writing is essential. When we write we not only look, we see; we not only react but reflect. Writing gives you something to hold onto in a changing world. “To write the present,” Quindlen says, “is to believe in the future.”

Start with Why Simon Sinek 2009-10-29 The inspiring, life-changing bestseller by the author of LEADERS EAT LAST and TOGETHER IS BETTER. In 2009, Simon Sinek started a movement to help people become more inspired at work, and in turn inspire their colleagues and customers. Since then, millions have been touched by the power of his ideas, including more than 28 million who've watched his TED Talk based on START WITH WHY -- the third most popular TED video of all time. Sinek starts with a fundamental question: Why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who've had the greatest influence in the world all think, act, and communicate the same way -- and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

Ebola Laurie Garrett 2014-11-18 Where does Ebola originate? How does it spread? And what should governments do to stop it? Few people understand the answers to these questions better than Pulitzer Prize-winning journalist Laurie Garrett. In this masterful account of the 1995 Ebola outbreak in Zaire, Garrett, now the Senior Fellow for Global Health at the Council on Foreign Relations, shows how superstition and fear, compounded by a lack of resources, education, and clearheaded government planning have plagued our response to Ebola. In an extensive new introduction, Garrett forcefully argues that learning from past outbreaks is the key to solving the Ebola crisis of 2014. In her account of the 1995 Zaire outbreak, first published in her bestselling book *Betrayal of Trust*, Garrett takes readers through the epidemic's course—beginning with the Kikwit villager who first contracted it from an animal encounter while chopping wood for charcoal deep in the forest. As she documents the

outbreak in riveting detail, Garrett shows why our trust in world governments to protect people's health has been irrevocably broken. She details the international community's engagement in the epidemic's aftermath: a pattern of response and abandonment, urgency that devolves into amnesia. *Ebola: Story of an Outbreak* is essential reading for anyone who wants to comprehend Ebola, one of mankind's most mysterious, malicious scourges. Garrett has issued a powerful call for governments, citizens, and the disease-fighting agencies of the wealthy world to take action.

Born a Crime Trevor Noah 2016-11-15 #1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A “brilliant” (Lupita Nyong’o, *Time*), “poignant” (Entertainment Weekly), “soul-nourishing” (USA Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.”—*Esquire* Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by *The New York Times*, USA Today, *San Francisco Chronicle*, NPR, *Esquire*, *Newsday*, and *Booklist* Trevor Noah’s unlikely path from apartheid South Africa to the desk of *The Daily Show* began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa’s tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. *Born a Crime* is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man’s relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to

save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

The first woman of color and immigrant to run a Fortune 50 company — and one of the foremost strategic thinkers of our time — she transformed PepsiCo with a unique vision, a vigorous pursuit of excellence, and a deep sense of purpose. Now, in a rich memoir brimming with grace, grit, and good humor, My Life in Full offers a firsthand view of Nooyi's legendary career and the sacrifices it so often demanded. The book offers an inside look at PepsiCo, and Nooyi's thinking as she steered the iconic

For the first time and in raw detail, Nooyi also lays bare the difficulties that came with managing her demanding job with a growing family, and what she learned along the way. Daniel Arsham 2018-10-09 The first comprehensive monograph on artist Daniel Arsham's genre-bending world. Daniel Arsham mines lusted-after consumer goods and iconic imagery to create his conceptual objects and sculptures. The artist then casts and refinishes his work to imitate the effects of erosion and subsidence, creating monuments to our present obsessions, as if the objects were rescued from Pompeii. That same impulse toward excavation animates many of his installations, which range from layered broken walls to geode-filled caverns to melting portals. From room-collapsing environmental installations for today's leading brands and museums to elaborate set design for classical dance, Arsham twists elements of architecture to create immersive aesthetic experiences that appeal to the divided attentions of a contemporary audience. Presented as an induction manual to Arsham's covetable world, the book will provide a complete overview of his practice. Virgil Abloh discusses Arsham's contribution to a post-media artistic landscape, a thread developed by Hans Ulrich Obrist in a conversation with the artist that traces art-historical precedents. Steven Matijcio will discuss the artist's projects and collaborations, which range from sets for Merce Cunningham's dance company to clothes and sneakers with streetwear icons Ronnie Fieg and Adidas to projects with James Franco and Pharrell Williams and films with Mahershala Ali.

Feedstock Recycling of Plastic Wastes Jose

Aguado 2007-10-31 The use of plastic materials has seen a massive increase in recent years, and generation of plastic wastes has grown proportionately. Recycling of these wastes to reduce landfill disposal is problematic due to the wide variation in properties and chemical composition among the different types of plastics. Feedstock recycling is one of the alternatives available for consideration, and *Feedstock Recycling of Plastic Wastes* looks at the conversion of plastic wastes into valuable chemicals useful as fuels or raw materials. Looking at both scientific and technical aspects of the recycling developments, this book describes the alternatives available. Areas include chemical depolymerization, thermal processes, oxidation and hydrogenation. Besides conventional treatments, new technological approaches for the degradation of plastics, such as conversion under supercritical conditions and coprocessing with coal are discussed. This book is essential reading for those involved in plastic recycling, whether from an academic or industrial perspective. Consultants and government agencies will also find it immensely useful.

Rethinking Contemporary Social Theory Roberta Garner 2017-09-19 The authors recontextualize contemporary sociological theory to argue that in recent decades sociology has been deeply permeated by a new paradigm, conflict constructionism. Their analysis integrates and sheds new light on eight prominent domains of recent social thought: the micro-level; discourses, framing, and renewed interest in signs and language; the construction of difference and dominance; regulation and punishment; cultural complexity and transculturation; the body; new approaches to the role of the state; and a consistent conflict perspective. The paradigm combines elements of both social construction theory and conflict theory. It has deep roots in critical theory and more recent links to postmodernism. It is associated with postmodern social thought, although it is less radical and more adaptable to empirical inquiry than postmodernism. The authors tie their new conceptualization of social theory to contemporary applications of social theory in everyday life. Features of this text:

Vitiligo and Other Hypomelanoses of Hair and Skin Jean-Paul Ortonne 2012-12-06

Leukoderma is a generic term for any pigmentary dilution, be it congenital or acquired, circumscribed or generalized, devoid of or partially lacking in pigmentation. In the approach to the diagnosis of leukoderma, we have generally first considered the age of onset, whether leukoderma was congenital or acquired, the extent and pattern of involvement, and the degree of pigmentary dilution. The organization of this monograph reflects this approach. For example, we have separated the section devoted to various disease entities into diffuse and circumscribed leukoderma and the latter into various etiologies such as genetic, metabolic, infectious, and endocrinologic. One of

several justifications for this monograph is to present an approach to the diagnosis of leukoderma, as detailed in Part II. In formulating a guide for the physician, we have found some limitations to our previous approach; we therefore offer the following new classification based upon a clinical-pathologic correlation. This could provide the means to describe both the clinical and pathologic findings in one term.

The Subtle Art of Not Giving a F**k Mark Manson 2016-09-13 #1 New York Times Bestseller Over 10 million copies sold In this generation-defining self-help guide, a superstar blogger cuts through the crap to show us how to stop trying to be "positive" all the time so that we can truly become better, happier people. For decades, we've been told that positive thinking is the key to a happy, rich life. "F**k positivity," Mark Manson says. "Let's be honest, shit is f**ked and we have to live with it." In his wildly popular Internet blog, Manson doesn't sugarcoat or equivocate. He tells it like it is—a dose of raw, refreshing, honest truth that is sorely lacking today. The Subtle Art of Not Giving a F**k is his antidote to the coddling, let's-all-feel-good mindset that has infected American society and spoiled a generation, rewarding them with gold medals just for showing up. Manson makes the argument, backed both by academic research and well-timed poop jokes, that improving our lives hinges not on our ability to turn lemons into lemonade, but on learning to stomach lemons better. Human beings are flawed and limited—"not everybody can be extraordinary, there are winners and losers in society, and some of it is not fair or your fault." Manson advises us to get to know our limitations and accept them. Once we embrace our fears, faults, and uncertainties, once we stop running and avoiding and start confronting painful truths, we can begin to find the courage, perseverance,

honesty, responsibility, curiosity, and forgiveness we seek. There are only so many things we can give a f**k about so we need to figure out which ones really matter, Manson makes clear. While money is nice, caring about what you do with your life is better, because true wealth is about experience. A much-needed grab-you-by-the-shoulders-and-look-you-in-the-eye moment of real-talk, filled with entertaining stories and profane, ruthless humor, The Subtle Art of Not Giving a F**k is a refreshing slap for a generation to help them lead contented, grounded lives.
