Now Helga should be happy-she has the life of her dreams, yet she's caught in a trap of her own making. Living a lie is harder than she'd imagined, her deep-seated mistrust of men still haunts her, and she's unable to even bare her body to her husband when they make love. As Helga struggles to hold onto the fraying threads of her marriage, a shadow from her past reappears. The Viking who loves her... For much of his life, overseer of the city's defenses Ulf Eriksson felt unworthy of his prestigious family name. Claiming a Viking noblewoman as his bride had finally allowed him to hold his head high as an Eriksson brother. Yet all is not well within his marriage. He'd hoped that his beloved Helga would come to trust him, but she remains frustratingly closed-off and distant, not even drobbing for the marriage bed. When outlaws breach the city wall and are revealed to be Helga's kin, the shocking truth about his wife is laid bare. Devastated, shamed, and with his reputation in tatters, Ulf doubts whether his marriage was even real or just one long con. Had the thief that stole his heart ever loved him? And, after all the lies and betrayal can he trust her again?

Criminal Theory Profiles Joshua D. Behl 2021-09-17 This book brings to life the major theories of crime and deviance by presenting detailed profiles that help readers differentiate each theory and its major propositions by better understanding how, when, and by whom the theory was formed. Criminology is based on strong theoretical foundations that attempt to answer the question of why people commit crime. Criminological theory is especially complex in that theorists come from a variety of disciplines including medicine, sociology, psychology, economics, and law. While not an exhaustive list of each theorist's works, nor an in-depth review of the empirical work that has been done on each theory, this text tracks the intellectual development of a theory by profiling the theorists who are responsible for the major ideas in criminological thought. By viewing the field in the context of the social conditions of the time and the personal histories of the theorists, students can better understand the intellectual history of each theory and the relationship between criminology and other fields, to grasp a better appreciation of how the science of crime and the study of criminals has evolved. All chapters are organized with a brief overview of the theorist and their significant ideas, a biographical profile of the theorist, coverage of the theoretical developments and contributions of the theorist, a list of major works by the theorist, and a summary detailing the overall legacy of the theorist in the field. This book is ideal for courses on criminology, criminological theory, and criminal behavior.
