Medicine Caroline Petit 2011-12-01 The extent to which classical theories about, and practices of, medical knowledge have shaped and continue to define medicine today is remarkable: but not always widely appreciated. Caroline Petit here offers a concise yet comprehensive account of medicine in antiquity which explores precisely that fascinating legacy. Discussing topics such as

medical ethics, diagnostic explanations of illness and disease, matters of sex and gender, the ancient division between body and soul, interpretations of madness and melancholia, and methods of medical teaching and dissemination, the author draws fascinating parallels between the ancient, early modern and modern periods. We learn, positively, that the ancient medical thinking of Galen, Hippocrates and Soranos of

Ephesus nourished the thought of some of the greatest physicians in history; but also that, negatively, modern medical thinkers sometimes misused ancient texts in pursuit of their own social and political agendas - a recurring problem in the history of medicine. Discussing a variety of ancient texts, from the Hippocratic era to the late Roman Empire, and examining contested literary evidence and interpretations, Petit skilfully traces the trajectory of medical practice from its magical and religious origins to a rational science of pathology, physiology, surgery and anatomy. *Cotton Ginnings* 1986 Cotton ginned by counties. *Good Morning, Dearie* Jerome Kern 2018-11-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. Land Cover Change and Its Eco-environmental Responses in Nepal Ainong Li 2017-08-22 This book offers a systematic investigation of the

ecological and environmental issues related to the land cover changes in Nepal by researchers from both China and Nepal. It discusses the eco-environmental issues faced by Nepal, particularly in the hills and mountain regions. It also sheds light on the global concerns regarding the eco-environment issues of mountains, and analyzes the various causes and potential consequences of eco-environmental degradation in Nepal. The book is of particular interest to students, researchers, experts, and decision-makers wanting to gain a general overview of land cover in Nepal and its dynamics, environment and natural resources, as well as mountain hazards. Southern Edwardseans Obbie Tyler Todd 2022-01-17 The founders and forerunners of the Southern Baptist Convention were fundamentally shaped by the thought of Puritan theologian Jonathan Edwards and his theological successors. While Baptists in the antebellum South boasted a different theological pedigree than Presbyterians or Congregationalists, and while they inhabited a

Southern landscape unfamiliar to the bustling cities and tall forests of New England, they believed their similarities with Edwards far outweighed their differences. Like Edwards, these Baptists were revivalistic, Calvinistic, loosely confessional, and committed to practical divinity. In these four things, Southern Edwardseanism lived, moved, and had its being. In the nineteenth-century, when so many Presbyterians scoffed at Edwards's "innovation" and Methodists scorned his Calvinism, Baptists found in Edwards a man after their own heart. By 1845, at the first Southern Baptist Convention, Southern Edwardseans had laid the groundwork for a convention marked by the theology of Jonathan Edwards.

Creating the Built Environment Leslie Holes

2003-09-02 We spend most of our lives in buildings and almost every building is unique.

The purpose of this book is to explain what buildings are and to provide an integrated overview of how they are built and sustained.

The book does not presume any specialist knowledge of buildings, seeking instead to explain why the different groups involved in designing, constructing, managing and occupying them follow certain procedures. It is particularly concerned with the generation and circulation of information between these groups. In taking this view, the book considers the recommendations of Sir Michael Latham's 1994 report Constructing the Team which called for better cohesion and communication between specialists in the construction industry.
