If ever a car rolled off the factory floor in the form of a blank slate, the VW Beetle is it. In fact, after taking delivery of their beloved Bug, many owners began modifications and customizations to personalize their favorite German compact. Perhaps the most charismatic automobile ever, the Volkswagen Beetle was the longest-running, most-manufactured automobile on a single platform in automotive history. From 1938 to 2003, more than 21.5 million Bugs were assembled, distributed, and sold on nearly every continent in the world. If there's a component that owners can modify, they'll do it, and each custom touch makes them love their Beetle even more. Airkooled Kustoms, a Volkswagen restoration and modification shop in Hazel Green, Alabama, has served all kinds of classic Volkswagen owners. For those who venture into the world of customization, no modern or historic trend is off-limits. These Volkswagen experts introduce and walk you through some of the most glorious customizations that Beetle owners can make to their rides. Transfer Society David N. Laband 2001-11-25 How much time, money, and other resources do Americans devote to influencing the distribution of wealth? According to David Laband and George McClintock, a conservative estimate of the total amount Americans spend on arranging or preventing forced transfers is more than \$2,000 for every man, woman, and child in America. That's not a statement of the amount forcibly redistributed, but of the amount spent in effecting the forcible transfer of resources. And, as the authors show, this is a very conservative estimate of the dead-weight losses associated with the transfer society. Through an ambitious cataloguing of different categories of expenditures on forced transfers and research into the amounts expended on each one, Laband and McClintock present a more complete picture of the effects of forced transfers than one would get from merely considering the aggregates of federal and state budgets or estimates of the amounts of wealth that change hands through the various forms of "freelance" redistribution, such as insurance fraud, theft, or extortion. After a careful examination of the measurable forms of dead-weight losses, the authors conclude by noting that the numbers they present understate the magnitude of resource expenditure on transfer activity in the United States. Moreover, the authors discuss the important question of why, relative to the huge amounts of wealth transferred by government at all levels, there is so little observable and measurable expenditure on effecting transfers. This book both poses problems and offers solutions to important issues in economics and political science.

Laowai for Sale Kurt M. DiClementi 2015-04-17 My recently completed novel entitled Laowai for Sale was written in the genre of realistic fiction, first-person omniscient. The plot of the story is the moral, financial, and spiritual bankruptcy of the American people as represented by the story's four main characters in China and the president of the United States in America. While the four main characters in China represent the hope that America can prevail against adversity and reclaim its legacy as the greatest nation on earth, the character of the president represents an America that is willing to mortgage its soul for sensual satisfaction with the risk of losing its identity and position on the world stage. These ideas are conveyed through satire and comedy in the character dialogue. The story's protagonist, John Winston, is an Asperger's syndrome savant with a photographic memory who attained material success through his musical ability and encyclopedic capacity for knowledge on all things regarding American pop music. Unfortunately, he lost everything, as did many others in the economic times that are characteristic of today's US economy. Because of the limited social skills associated with his disability, Winston descends into a downward spiral that resulted in his isolation and drinking. Then he is whisked away to China with three other main characters in a government program to stem the mounting crisis of an unemployment rate that has exceeded 50 percent. This crisis seriously threatens the US president's chances for a second term in office, so his chief of staff devises a plan, using the CIA, to initiate a massive, wholesale exportation of America's unemployed labor force to China as English teachers in order to rapidly change the unemployment statistics.
