Many aspects of agriculture in PNG are described in this data-rich book. Topics include agricultural environments in which crops are grown; production of food crops, cash crops and animals; land use; soils; demography; migration; the macro-economic environment; gender issues; governance of agricultural institutions; and transport. The Economics of Counterfeit Trade Peggy E Chaudhry 2009-02-21 The expansion of world trade has brought with it an explosive growth in counterfeit merchandise. Estimates put the world total for counterfeit products at about one half trillion dollars annually, although it is impossible to accurately determine the true size of the counterfeit market. What is known is that this illicit trade has infected nearly every industry from pharmaceuticals to aircraft parts. Software and music piracy are easy targets widely reported in the media. In 2007, the Business Software Alliance (BSA) estimated that 38% of personal computer software installed worldwide was illegal and the losses to the software industry were \$48 billion worldwide. The Recording Industry Association of America (RIAA) reported a 58% increase in the seizures of counterfeit CDs. Overall, a wide range of industries agree that there is a severe problem with the protection of intellectual property rights (IPR) throughout the world, yet there have been virtually no attempts to describe all aspects of the problem. This work aims to give the most complete description of various characteristics of the IPR environment in a global context. We believe a holistic understanding of the problem must include consumer complicity to purchase counterfeit products, tactics of the counterfeiters (pirates) as well as actions (or inaction) by home and host governments, and the role of international organizations and industry alliances. This book establishes the full environmental aspects of piracy, describes successful anti-counterfeiting actions and then prescribes measures IPR owners should take to protect their intellectual property.

At the Edges of Citizenship Kate Hepworth 2016-04-22 Proposing a new, dynamic conception of citizenship, this book argues against understandings of citizenship as a collection of rights that can be either possessed or endowed, and demonstrates it is an emergent condition that has temporal and spatial dimensions. Furthermore, citizenship is shown to be continually and contingently reconstituted through the struggles between those considered insiders and outsiders. Significantly, these struggles do not result in a clear division between citizens and non-citizens, but in a multiplicity of states that are at once included within and excluded from the political community. These liminal states of citizenship are elaborated in relation to three specific forms of non-citizenship: the 'respectable illegal,' the 'intimate foreigner' and the 'object citizen'. Each of these modalities of citizenship corresponds to either the figure of the clandestino/a or the nomad as invoked in the 2008 Italian Security Package and a second set of laws, commonly referred to as the 'Nomad Emergency Decree'. Exploring how this legislation affected and was negotiated by individuals and groups who were constituted as 'objects of security', author Kate Hepworth focuses on the first-hand experience of individuals deemed threats to the nation. Situated within the field of human geography, the book draws on literature from citizenship studies, critical security studies and migration studies to show how processes of securitisation and irregularisation work to delimit between citizens and non-citizens, as well as between legitimate and illegitimate outsiders.
