Around the World in Eighty Days Jules Verne 2017-02-14 *Around the World in Eighty Days* (French: Le tour du monde en quatre-vingts jours) is a classic adventure novel by the French writer Jules Verne, published in 1873. In the story, Phileas Fogg of London and his newly employed French valet Passepartout attempt to circumnavigate the world in 80 days on a £20,000 wager (equal to about £2 million in 2016) set by his friends at the Reform Club. It is one of Verne's most acclaimed works.Plot:Phileas Fogg is a rich British gentleman living in solitude. Despite his wealth, Fogg lives a modest life with habits carried out with mathematical precision. Very little can be said about his social life other than that he is a member of the Reform Club. Having dismissed his former valet, James Forster, for bringing him shaving water at 84 F (29 C) instead of 86 F (30 C), Fogg hires a Frenchman by the name of Jean Passepartout as a replacement.At the Reform Club, Fogg gets involved in an argument over an article in The Daily Telegraph stating that with the opening of a new railway section in India, it is now possible to travel around the world in 80 days. He accepts a wager for £20,000 (equal to about £1.6 million in 2015) from his fellow club members to complete such a journey within this time period. Accompanied by Passepartout, Fogg departs from London by train at 8:45 P.M. on October 2; in order to win the wager, he must return to the club by this same time on December 21, 80 days later.....Jules Gabriel Verne (8 February 1828 - 24 March 1905) was a French novelist, poet, and playwright best known for his adventure novels and his profound influence on the literary genre of science fiction.Verne was born to bourgeois parents in the seaport of Nantes, where he was trained to follow in his father's footsteps as a lawyer, but quit the profession early in life to write for magazines and the stage. His collaboration with the publisher Pierre-Jules Hetzel led to the creation of the Voyages extraordinaires, a widely popular series of scrupulously researched adventure novels including Journey to the Center of the Earth (1864), Twenty Thousand Leagues Under the Sea (1870), and Around the World in Eighty Days (1873).Verne is generally considered a major literary author in France and most of Europe, where he has had a wide influence on the literary avant-garde and on surrealism.His reputation is markedlydifferent in Anglophone regions, where he has often been labeled a writer of genre fiction or children's books, largely because of the highly abridged and altered translations in which his novels are often reprinted.Verne has been the second most-translated author in the world since 1979, ranking between Agatha Christie and William Shakespeare.He has sometimes been called the "Father of Science Fiction", a title that has also been given to H. G. Wells and Hugo Gernsback.George Makepeace Towle (August 27, 1841, Washington, D.C. - August 9, 1893, Brookline, Massachusetts) was an American lawyer, politician, and author. He is best known for his translations of Jules Verne' s works, in particular his 1873 translation of Around the World in Eighty Days.
