**Idea Man** Paul Allen  
2011-04-19 By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made

his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen

discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this classic memoir, Allen explains how he has solved problems, what he's learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.

Building Research* Carmen  
Llinares-Millán

2014-01-31 Many areas of  
knowledge converge in  
the building industry  
and therefore research  
in this field  
necessarily involves an  
interdisciplinary  
approach. Effective

research requires strong  
relation between a broad  
variety of scientific  
and technological  
domains and more  
conventional  
construction or craft  
processes, while also  
considering advanced  
management processes,  
where all the main  
actors permanently  
interact. This  
publication takes an  
interdisciplinary  
approach grouping  
various studies on the  
building industry chosen  
from among the works  
presented for the 2nd  
International Conference  
on Construction and  
Building Research. The  
papers examine aspects  
of materials and  
building systems;  
construction technology;  
energy and  
sustainability;  
construction management;  
heritage, refurbishment  
and conservation. The  
information contained  
within these pages may

be of interest to researchers and practitioners in construction and building activities from the academic sphere, as well as public and private sectors.

Killing Love Rebecca Poulson 2015-09-01 This powerful, unforgettable and uplifting story is one part wrenching family memoir, and one part inspirational journey towards healing and forgiveness – but most of all, it's an unputdownable journey through one family's tragedy and how they refused to let it define them. On the day of Rebecca Poulson's 33rd birthday, her father, niece and nephew were murdered. The murderer had been part of her family; her brother-in-law, Neung, the father of the children. Killing Love is Rebecca's journey through homicide; grief, the

police investigations, the media interest, the court cases, the moments of great despair – and the healing. It is a story of individual tragedy and a family's strength, but it is also a story of a community's attitude to family violence. As a reluctant warrior for those who cannot speak for themselves, Rebecca talked to the NSW State Premier and politicians, on multiple TV shows and to print journalists in the hope that the mistakes made by the police force, DOCS, the legal system and solicitors will never be made again. Rebecca's contact with policy makers has been nothing short of history-making, and her story has directly influenced domestic violence laws in the state. Neung left a note for Rebecca's family; he hoped that he would destroy them. This

is the story of how he didn't.

Living up to these beliefs is fun when you're doing it right, and it creates amazingly loyal customers, but it isn't easy. This is the first book to tell the full, inside story of the inspiring rise, tragic mistakes, devastating fall, determined recovery, and ongoing renewal of one of the most iconic mission-

driven companies in the world. No previous book has focused so intently on the challenges presented by staying true to the mission as the business grew. No other book has explained how the company came to be sold to Unilever, one of the world's biggest corporations. And none has described the unprecedented contract Ben & Jerry's negotiated with Unilever to preserve the three-part mission or the complex working relationship that has allowed the company to pursue that mission on a much larger stage. Brad Edmondson tells the story with a journalist's eye for details, dramatic moments, and memorable characters. Among the dozens of key figures Edmondson interviewed, his most important source was Jeff Furman, who helped Ben and Jerry write their first

business plan in 1978 and has stayed involved ever since, serving as chairman of the board since 2010. It's a funny, sad, surprising, and ultimately hopeful story."--Publisher's description.

*Japanese Foreign Direct Investment and the East Asian Industrial System*  
H. Horaguchi 2013-03-09  
Japanese foreign direct investment has played a leading role in Asian economies for more than two decades. This book, describing the changing industrial dynamics after the Asian currency crisis in 1997, focuses on corporate strategies of Japanese automobile and electronics companies in Asian nations, with detailed analysis of management issues and strategies from the viewpoint of both the home economy and the recipient host economies. Among the cases presented are the

global restructuring of the Korean automobile industry and the transfer of automotive technology to China via Taiwan. Other studies, from the electronics industry, look at production sites in Malaysia, backward integration in Singapore, and forward integration in Hong Kong. The contributions of specialists from Asia, Europe, and the United States collected here envision an ongoing process of globalization and provide valuable perspective and background for business management and East Asian studies.

The Rock History Reader  
Theo Cateforis 2013  
The Rock History Reader is an eclectic compilation of readings that tells the history of rock as it has been received and explained as a social and musical practice throughout its six

decade history. The readings range from the vivid autobiographical accounts of such rock icons as Ronnie Spector and David Lee Roth to the writings of noted rock critics like Lester Bangs and Chuck Klosterman. It also includes a variety of selections from media critics, musicologists, fanzine writers, legal experts, sociologists and prominent political figures. Many entries also deal specifically with distinctive styles such as Motown, punk, disco, grunge, rap and indie rock. Each entry includes headnotes, which place it in its historical context. This second edition includes new readings on the early years of rhythm & blues and rock 'n' roll, as well as entries on payola, mods, the rise of FM rock, progressive rock and the PMRC congressional hearings.

In addition, there is a wealth of new material on the 2000s that explores such relatively recent developments as emo, mash ups, the explosion of internet culture and new media, and iconic figures like Radiohead and Lady Gaga. With numerous readings that delve into the often explosive issues surrounding censorship, copyright, race relations, feminism, youth subcultures, and the meaning of musical value, The Rock History Reader continues to appeal to scholars and students from a variety of disciplines.

### **Spearhead of Logistics**

Benjamin King 2016-02-25  
Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army

community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity

of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

**You Know Me Al** Ring Lardner 2004

Lardner, America's great humorist and shortstory writer, began his career as a sports writer.

Because of his interest in baseball, he began putting stories in his newspaper column that were purportedly written by unlettered athletes.

Lardner, who had an excellent ear for dialogue, actually wrote these stories in the voice of the fictional rookie ballplayer Jack Keefe, a White Sox pitcher, who writes letters to his friend Al Blanchard back home in Bedford, Indiana.

Several streams of American comic tradition merge in *You Know Me Al*: the comic letter, the wisecrack, the braggart character, the use of sporting vocabulary and fractured English as a means to apologetics.

This collection of short stories revealed Lardner's talent for the sports idiom he made

famous. Usually cynical and pessimistic, his stories are peopled by ordinary characters.

Lardner often used his own experiences as the model or inspiration for the fiction he wrote.

**Black on Both Sides** C. Riley Snorton 2017-12-05 The story of Christine Jorgensen, America's first prominent transsexual, famously narrated trans embodiment in the postwar era. Her celebrity, however, has obscured other mid-century trans narratives—ones lived by African Americans such as Lucy Hicks Anderson and James McHarris. Their erasure from trans history masks the profound ways race has figured prominently in the construction and representation of

transgender subjects. In *Black on Both Sides*, C. Riley Snorton identifies multiple intersections between blackness and transness from the mid-nineteenth century to present-day anti-black and anti-trans legislation and violence. Drawing on a deep and varied archive of materials—early sexological texts, fugitive slave narratives, Afro-modernist literature, sensationalist journalism, Hollywood films—Snorton attends to how slavery and the production of racialized gender provided the foundations for an understanding of gender as mutable. In tracing the twinned genealogies of blackness and transness, Snorton follows multiple trajectories, from the medical experiments conducted on enslaved black women by J. Marion

Sims, the “father of American gynecology,” to the negation of blackness that makes transnormativity possible. Revealing instances of personal sovereignty among blacks living in the antebellum North that were mapped in terms of “cross dressing” and canonical black literary works that express black men’s access to the “female within,” *Black on Both Sides* concludes with a reading of the fate of Phillip DeVine, who was murdered alongside Brandon Teena in 1993, a fact omitted from the film *Boys Don’t Cry* out of narrative convenience.

Reconstructing these theoretical and historical trajectories furthers our imaginative capacities to conceive more livable black and trans worlds.

*Testimonios: Stories of Latinx and Hispanic*

*Mathematicians* Pamela E. Harris 2021-08-16  
Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and

aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community. The Tale of Genji John T. Carpenter 2019-03-04  
With its vivid descriptions of courtly society, gardens, and architecture in early eleventh-century Japan, *The Tale of Genji*—recognized as the world’s first novel—has captivated audiences around the globe and inspired artistic traditions for one thousand years. Its female author, Murasaki Shikibu, was a diarist, a renowned poet, and, as a tutor to the young empress, the ultimate palace insider; her monumental work of fiction offers entry into an elaborate, mysterious world of court romance, political intrigue, elite customs,

and religious life. This handsomely designed and illustrated book explores the outstanding art associated with Genji through in-depth essays and discussions of more than one hundred works. The Tale of Genji has influenced all forms of Japanese artistic expression, from intimately scaled albums to boldly designed hanging scrolls and screen paintings, lacquer boxes, incense burners, games, palanquins for transporting young brides to their new

homes, and even contemporary manga. The authors, both art historians and Genji scholars, discuss the tale's transmission and reception over the centuries; illuminate its place within the history of Japanese literature and calligraphy; highlight its key episodes and characters; and explore its wide-ranging influence on Japanese culture, design, and aesthetics into the modern era. p.pl
