Management Today "Thorough and well-grounded." The Economist "It comprehensively demolishes the business logic behind BMW's flawed acquisition of Rover." Financial Times BMW promised a bright new future for Rover. In turn, Rover was to keep BMW as the independent car dynasty it wanted to remain. But it all went wrong. Badly wrong. End of the Road is the full story of the eight-year saga of BMW's ownership of Rover - from acquisition to sale and subsequent aftermath. Witness the clash of cultures, battle of executive egos, disastrous decisions and boardroom bloodshed. Based on unparalleled and officially sanctioned access to all the major players, Brady and Lorenz reveal the full story. Find out how BMW and MG Rover have fared since the sale, and share the authors' predictions for the future of both companies. The BMW purchase of Rover was

seen as the end of a great British industry. It was also the start of a great British drama... *Record of the Hampden-Sydney Alumni Association; V. 7, No. 2, January 1933* Hampden-Sydney College 2021-09-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. Strangers in Their Own Land Arlie Russell Hochschild 2018-02-20 The National Book Award Finalist and New York Times bestseller that became a guide and balm for a country struggling to understand the election of Donald Trump "A generous but disconcerting look at the Tea Party. . . . This is a smart, respectful and compelling book." —Jason DeParle, The New York Times Book Review When Donald Trump won the 2016 presidential election, a bewildered nation turned to Strangers in Their Own Land to understand what Trump voters were thinking when they cast their ballots. Arlie Hochschild, one of the most influential sociologists of her generation, had spent the preceding five years immersed in the community around Lake Charles, Louisiana, a Tea Party stronghold. As Jedediah Purdy put it in the New Republic, "Hochschild is fascinated by how people make sense of their lives. . . . [Her] attentive, detailed portraits . . . reveal a gulf between Hochschild's

'strangers in their own land' and a new elite." Already a favorite common read book in communities and on campuses across the country and called "humble and important" by David Brooks and "masterly" by Atul Gawande, Hochschild's book has been lauded by Noam Chomsky, New Orleans mayor Mitch Landrieu, and countless others. The paperback edition features a new afterword by the author reflecting on the election of Donald Trump and the other events that have unfolded both in Louisiana and around the country since the hardcover edition was published, and also includes a readers' group guide at the back of the book.

Results Bruce A. Pasternack 2005-10-18 Every company has a personality. Does yours help or hinder your results? Does it make you fit for growth? Find out by taking the quiz that's helped 50,000 people better understand their organizations at OrgDNA.com and to learn more about Organizational DNA. Just as you can understand an individual's personality, so too can you understand a company's type—what makes it tick, what's good and bad about it. Results explains why some organizations bob and weave and roll with the punches to consistently deliver on commitments and produce great results, while others can't leave their corner of the ring without

tripping on their own shoelaces. Gary Neilson and Bruce Pasternack help you identify which of the seven company types you work for—and how to keep what's good and fix what's wrong. You'll feel the shock of recognition ("That's me, that's my company") as you find out whether your organization is:

- **Passive-Aggressive** ("everyone agrees, smiles, and nods, but nothing changes"): entrenched underground resistance makes getting anything done like trying to nail Jell-O to the wall
- **Fits-and-Starts** ("let 1,000 flowers bloom"): filled with smart people pulling in different directions
- **Outgrown** ("the good old days meet a brave new world"): reacts slowly to market developments, since it's too hard to run new ideas up the flagpole
- **Overmanaged** ("we're from corporate and we're here to help"): more reporting than working, as managers check on their subordinates' work so they can in turn report to their bosses
- **Just-in-Time** ("succeeding, but by the skin of our teeth"): can turn on a dime and create real breakthroughs but

also tends to burn out its best and brightest • Military Precision (“flying in formation”): executes brilliant strategies but usually does not deal well with events not in the playbook • Resilient (“as good as it gets”): flexible, forward-looking, and fun; bounces back when it hits a bump in the road and never, ever rests on its laurels For anyone who’s ever said, “Wow, that’s a great idea, but it’ll never happen here” or “Whew, we pulled it off again, but I’m tired of all this sprinting,” Results provides robust, practical ideas for becoming and remaining a resilient business. Also available as an eBook From the Hardcover edition.

Pre-Incident Indicators of Terrorist

Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists

resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Porsche 928, 924, 944 and 968 Marc Cranswick
2016-03-28 Porsche AG, today the most

profitable car company in the world, was in 1975 a small but headstrong German automaker on the verge of its most significant development. New national laws were changing the way manufacturers designed their products, but the auto consumer was also craving more exciting and innovative design. That innovation came in 1975 with the release of the revolutionary Porsche 924. This book begins its analysis with the creation of the Porsche 924 and the impact it made on the automotive world. During the 1980s, Porsche honed earlier 924 designs to create the 944 and its Turbo and convertible variants, and later the 968, completing a line that has produced some of the most respected sports cars of the modern era. The text also follows in detail the long production life and development of Porsche's V-8 powered high performance grand tourer, the 928—introduced in 1977, named the 1978 European Car of the Year and culminating in the 350 bhp 928 GTS of the 1990s. This history of the dynamic Porsche family gives

a full account of each model and reveals the unique contributions each has made to a constantly evolving automotive world.
