The Girl Next Door Emma Hart 2020-08-23 One accidental pregnancy. One fake husband. What can go wrong? There's nothing like starting your Monday morning with a positive pregnancy test. Trust me, I know. Because I'm looking at one right now. All I can think is: Oh, hell. My grandmother is going to kill me. This might just send her to an early grave, so there's only one option--pretending the father is my new husband. If only he'd agree to fake it. Kai Connors was supposed to be nothing more than a one-night stand. A long, dirty, one-night stand fueled by one too many tequila shots, where the only promise was to never speak of it again. But if my unfairly sexy next-door neighbor gets his way, this fake marriage could turn out to be very, very real... The Girl Next Door paperback includes the prequel short story, The

One-Night Stand Next Door.

High Risk Ben Timberlake

2021-12-01 This is a dark, raw and uncompromising tale of the human condition in extremis, drawing on the many lives of Ben Timberlake: as an archaeologist, Special Forces soldier, combat medic and drug addict. Starting with Ben's first near-death experience--in a Nazi-themed bar in wartime Yugoslavia--High Risk is a whirlwind tour of everything from service in the SAS, combat in Iraq, and encounters with a gambling-obsessed 9/11 hijacker, to veterans blissed out on MDMA, hook-ups in the world of extreme sex, and battling a heroin habit on a remote Scottish island. Ben pursued the rush, and the chase often took him over the edge. Instead of asking why, he asked, why not? Blending confessional narrative, classic reportage and acerbic humour, this memoir takes a gonzo look at terrorists, junkies,

soldiers and strippers, through the tale of one extraordinary life.

War and Militarism in Modern Japan Guy Podoler 2009-08-01 A considerable amount of writing has been published on Japan at war in WWII. Scholars have been revisiting the Russo-Japanese War of 1904-5. This volume examines Japan's twentieth-century approach to war and militarism in a wider perspective, bringing hitherto unexamined new themes and subject-matter under scrutiny up to the present day.

Principles of Marketing Gary M. Armstrong 2018 An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

The World of Automobiles 1974

Belize Survivor Nancy R. Koerner 2007 In the early seventies, the anti-establishment counterculture evolved into a new movement of health and agricultural purists. Rebelling against the politics and pollution of the U.S., these young people sought to create their own natural paradise outside its borders. This is the story of one such expatriated American, a

starry-eyed wild child who searches for a fantasy lifestyle and gets more than she bargains for. The storyline, a colorful tapestry of romantic adventure set in the jungles of Belize, Central America, is flavored with vivid imagery, picturesque characters, wild animals, and Mayan archaeological intrigue. But it is also a compelling story of a maturing young woman and her battle with the darker side of human nature, of innocence lost, deception, infidelity, and heartbreaking exile. Full of poignant moral dilemma, it is a story of one woman's survival, of exceptional courage, strength in overcoming adversity, spiritual growth, and eventual triumph.

Marketing Mistakes Robert F. Hartley 1984-03-01 "In a lively conversational style, Robert Hartley provides play-by-play analyses of actual decisions and practices that led to major marketing wars, comebacks, crises, and triumphs in top

Pre-Incident Indicators of Terrorist Incidents

Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This

study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents.

Turbo 3.0 (Publisher's Edition)

Rya Snodgrass 2018-01-30 Carefully researched using the Porsche factory archives, private collections, period documentation and intensive study. In an attempt to cover everything an owner, restorer, historian or enthusiast would want to know about the dawn of Porsche's turbocharged supercar, the Turbo 3.0 book includes a considerable amount of material never before published. For example: comprehensive discussions of original options, close-up photos of key details, scenes from factory production, coverage of special one-off models and period motorsports. This

exhaustive volume not only covers the privateer racing exploits of the 3.0-liter Turbo, but also the development of production-based turbocharged race cars by examining the Carrera RSR Turbo 2.14 and Turbo RSR 934/934.5. Additionally, it includes interviews with factory engineers, development drivers and racing pilots involved with the development of Porsche's original Turbo. This is the definitive book about Porsche's immortal 3.0-liter Turbo and it is essential reading for anyone who has ever owned, driven or simply lusted after the first supercar of the modern era.

The Land Crusier Legend
Alexander Wohlfarth
2018-06 - A complete history of these impressive vehicles which includes technical specs of all models and production lines- Includes a separate timeline-poster of the history of the Land Cruiser- Revised and extended

editionDeveloped in 1951 as Toyota's version of a Jeep-like vehicle, the Land Cruiser has been produced in convertible, hardtop, station wagon and utility truck versions plus its current flagship 4WD vehicle. Its reliability and longevity has led to huge popularity, especially in Australia where it has reliably performed under the toughest environmental conditions - "Gets you there ... gets you back"! The author, Alexander Wohlfahrt, tells the history of these impressive vehicles, describes the people who drive them and their philosophy of this type of car - whether they use it for fun or business. Last but not least the reader will also find the complete technical specifications of all models and production lines within this highly illustrated book.

Shakespeare, Objects and Phenomenology Susan Sachon 2019-12-24 This book explores ways in which Shakespeare's writing

strategies shape our embodied perception of objects – both real and imaginary – in four of his plays. Taking the reader on a series of perceptual journeys, it engages in an exciting dialogue between the disciplines of phenomenology, cognitive studies, historicist research and modern acting techniques, in order to probe our sentient and intuitive responses to Shakespeare’s language. What happens when we encounter objects on page and stage; and how we can imagine that impact in performance? What influences might have shaped the language that created them; and what do they reveal about our response to what we see and hear? By placing objects under the phenomenological lens, and scrutinising them as vital conduits between lived experience and language, this book illuminates Shakespeare’s writing as a rich source for

investigation into the way we think, feel and communicate as embodied beings.

Factory 19 Dennis Glover 2020-11-03 We’re told that the future will be brighter. But what if human happiness really lies in the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and begins to unload its cargo on the site of the once famous but now abandoned Gallery of Future Art, known to the world as GoFA. One day the city’s residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA’s owner, world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He’s going to defeat technology’s dominance over our lives by establishing a new Year Zero: 1948. Those whose jobs have been destroyed by

Amazon and Uber and Airbnb are invited to fight back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. 'Like Orwell, of whom he has written so brilliantly, Dennis Glover's work is charged with courage, intelligence and purpose. He is the complete writer, and one made for our times.' —Don Watson 'Savagely hilarious and unlike anything else you'll read this year. It boils with the anger of the present moment.' —Rohan Wilson

Feeling and Ugly Mupotsa, Danai 2018-08-28 DANAI MUPOTSA was born in Harare, and has lived in Botswana, the United States and South Africa where she is now based. She describes herself as a teacher and writer. *Feeling and Ugly* was largely written between 2016 and 2018, although some of the poems were written earlier or previously published in some form. The collection gathers the various statuses and locations she moves across, as daughter, mother, teacher, scholar and writer. From these places, many of the poems try to approach difficult feelings about what it means to "do politics" from an empathetic complexity. "I'm raging, sometimes that makes me petty" is one such example. The collection carries a set of standpoints, or willfulness

about pedagogy, politics and optimism. And while she carries an attachment to a non-reparative, or negative affect across the collection, she closes in describing the work, or all of her work, as love poems. This collection is a long love letter to those who are wilful.

Second Suns David Oliver Relin 2013-06-18 From the co-author of *Three Cups of Tea* comes the inspiring story of two very different doctors—one from the United States, the other from Nepal—united in a common mission: to rid the world of preventable blindness. In this transporting book, David Oliver Relin shines a light on the work of Geoffrey Tabin and Sanduk Ruit, gifted ophthalmologists who have dedicated their lives to restoring sight to some of the world's most isolated, impoverished people through the Himalayan Cataract Project, an organization they founded in 1995. Tabin was the high-

achieving bad boy of Harvard Medical School, an accomplished mountain climber and adrenaline junkie as brilliant as he was unconventional. Ruit grew up in a remote Nepalese village, where he became intimately acquainted with the human costs of inadequate access to health care. Together they found their life's calling: tending to the afflicted people of the Himalayas, a vast mountainous region with an alarmingly high incidence of cataract blindness. *Second Suns* takes us from improvised plywood operating tables in villages without electricity or plumbing to state-of-the-art surgical centers at major American universities where these two driven men are restoring sight—and hope—to patients from around the world. With their revolutionary, inexpensive style of surgery, Tabin and Ruit have been able to cure tens of thousands—all for about twenty dollars per

operation. David Oliver Relin brings the doctors' work to vivid life through poignant portraits of patients helped by the surgery, from old men who cannot walk treacherous mountain trails unaided to cataract-stricken children who have not seen their mothers' faces for years. With the dexterity of a master storyteller, Relin shows the profound emotional and practical impact that these operations have had on patients' lives. *Second Suns* is the moving, unforgettable story of how two men with a shared dream are changing the world, one pair of eyes at a time. Praise for *Second Suns* "As miracles go, it's hard to beat making the blind see. Yet that's exactly what the eye surgeon Dr. Geoffrey Tabin can do. He services poor people in the developing world who have developed cataracts—a clouding of the lens of the eye that is the world's leading cause of blindness. . . . *Second Suns* is a hopeful

work, a profile of two doctors who have dedicated their lives to bringing light to those in darkness."—*Time* "A compelling and inspiring book . . . *Second Suns* portrays heroic health care delivered under harrowing conditions: Ruit and his teams carry their equipment on multi-day treks up steep mountain trails, sometimes hiking at night with flashlights or head lamps, to reach settlements where they typically spend several days operating on hundreds of villagers in makeshift surgical theaters."—*The Washington Post* "*Second Suns* should be required reading for anybody with an interest in humanitarian philanthropy—or, for that matter, a desire to feel a little better about the world."—*Outside* "A detailed, heartfelt account of the work of [two] dedicated pioneers."—*Kirkus Reviews* From the Hardcover edition.

Chains Work for Development

Daria Taglioni 2016-06-10
Economic, technological, and political shifts as well as changing business strategies have driven firms to unbundle production processes and disperse them across countries. Thanks to these changes, developing countries can now increase their participation in global value chains (GVCs) and thus become more competitive in agriculture, manufacturing and services. This is a paradigm shift from the 20th century when countries had to build the entire supply chain domestically to become competitive internationally. For policymakers, the focus is on boosting domestic value added and improving access to resources and technology while advancing development goals. However, participating in global value chains does not automatically improve living standards and social

conditions in a country. This requires not only improving the quality and quantity of production factors and redressing market failures, but also engineering equitable distributions of opportunities and outcomes - including employment, wages, work conditions, economic rights, gender equality, economic security, and protecting the environment. The internationalization of production processes helps with very few of these development challenges. Following this perspective, *Making Global Value Chains Work for Development* offers a strategic framework, analytical tools, and policy options to address this challenge. The book conceptualizes GVCs and makes it easier for policymakers and practitioners to discuss them and their implications for development. It shows why GVCs require fresh thinking; it serves as a repository of analytical

tools; and it proposes a strategic framework to guide policymakers in identifying the key objectives of GVC participation and in selecting suitable economic strategies to achieve them.

Decompression Juli Zeh

2015 A psychological thriller in the tradition of Patricia Highsmith about two couples caught in a web of conflicting passions while deep-sea diving off the beautiful Canary Islands In the late 1990s, Sven Fiedler and his girlfriend, Antje, left Germany for the island of Lanzarote, rejecting what Sven considered a vulgar culture of materialism and judgment. The young couple set up a diving service catering to tourists eager to bask in the warm sunshine and explore the silent, gleaming marine paradise that makes this otherwise barren volcanic island such a remarkable retreat. Sven's approach was simple: take the mechanics of diving seriously, instruct his clients clearly, and stay out of their personal business as best he can. And life on the island goes smoothly until two German tourists--Jola von der Pahlen, a daytime soap

star on the verge of cinematic success, and Theo Hast, a stalled novelist--engage Sven for a high-priced, intensive two-week diving experience. Staying in a guest house on Sven and Antje's property, the two visitors and their hosts quickly become embroiled in a tangle of jealousy and suspicion. Sven is struck by Jola's beauty, her evident wealth, and her apparently volatile relationship with the much older Theo. Theo quickly leaps to the conclusion that Sven and Jola are having an affair, but, oddly, he seems to facilitate it rather than trying to intervene. Antje, looking on, grows increasingly wary of these particular clients. As the point of view shifts from one character to the next, the reader is constantly kept guessing about who knows what, and, more important, who is telling the truth. A brutal game of delusion, temptation, and manipulation plays out,

pointing toward a violent end. But a quiet one, down in the underwater world beneath the waves.

Emily Post Laura Claridge 2008-10-14 "What would Emily Post do?" Even today, Americans cite the author of the perennial bestseller *Etiquette* as a touchstone for proper behavior. But who was the woman behind the myth, the authority on good manners who has outlasted all comers? Award-winning author Laura Claridge presents the first authoritative biography of the unforgettable woman who changed the mindset of millions of Americans, an engaging book that sweeps from the Gilded Age to the 1960s.

Chassis Engineering Herb Adams 1992-11-19 In most forms of racing, cornering speed is the key to winning. On the street, precise and predictable handling is the key to high performance driving. However, the art and science of engineering a chassis can be difficult to

comprehend, let alone apply. *Chassis Engineering* explains the complex principles of suspension geometry and chassis design in terms the novice can easily understand and apply to any project. Hundreds of photos and illustrations illustrate what it takes to design, build, and tune the ultimate chassis for maximum cornering power on and off the track.

Car Guys vs. Bean Counters

Bob Lutz 2011-06-09 A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the

early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone

creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.
