Starseed Stephen Guy 2020-10-19 In a world illuminated by gaslight, a wealthy, debauched dandy's mentor tests the limits of conscience with a series of human-alien hybridization experiments, facilitated by the decryption of a forbidden text now known as the Voynich Manuscript. Not knowing what it is they've unleashed, mayhem ensues, with hired killers, Brazilian Wandering Spiders, and shady professionals willing to undertake the performance of any act that one should be ashamed to ask for. There is flesh, and the power that holds. Juices run, blood flows, and ichor oozes. The dandy soon comes to learn that wealth cannot buy love, the past exists for nothing so much as to haunt the present, and as long as there is desire, the Star Flower will procure what it needs to bloom, and spread its seed through the cosmos.

Embedded Security in Cars Kerstin Lemke 2006-03-28 Most innovations in the car industry are based on software and electronics, and IT will soon constitute the major production cost factor. It seems almost certain that embedded IT security will be crucial for the next generation of applications. Yet whereas software safety has become a relatively well-established field, the protection of automotive IT systems against manipulation or intrusion has only recently started to emerge. Lemke, Paar, and Wolf collect in this volume a state-of-the-art overview on all aspects relevant for IT security in automotive applications. After an introductory chapter written by the editors themselves, the contributions from experienced experts of different disciplines are structured into three parts. "Security in the Automotive Domain" describes applications for which IT security is crucial, like immobilizers, tachographs, and software updates. "Embedded Security Technologies" details security technologies relevant for automotive applications, e.g., symmetric and asymmetric cryptography, and wireless security. "Business Aspects of IT Systems in Cars" shows the need for embedded security in novel applications like location-based navigation systems and personalization. The first book in this area of fast-growing economic and scientific importance, it is indispensable for both researchers in software or embedded security and professionals in the automotive industry.

Feeling and Ugly Mupotsa, Danai 2018-08-28 DANAI MUPOTSA was born in Harare, and has lived in Botswana, the United States and South Africa where she is now based. She describes herself as a teacher and writer. Feeling and Ugly was largely written between 2016 and 2018, although some of the poems were written earlier or previously published in some form. The collection gathers the various statuses and locations she moves across, as daughter, mother, teacher, scholar and writer. From these places, many of the poems try to approach difficult feelings about what it means to “do politics” from an empathetic complexity. “I’m raging, sometimes that makes me petty” is one such example. The collection carries a set of standpoints, or willfulness about pedagogy, politics and optimism. And while she carries an attachment to a non-reparative, or negative affect across the collection, she closes in describing the work, or all of her work, as love poems. This collection is a long love letter to those who are wilful.
